PROJECT OVERVIEW

This project analysis global music streaming listener preferences & engagement using Microsoft excel.

The analysis will examine listener demographics, streaming platforms, genre, most played artist, listening behavior, subscription types, weekly engagement metrics to identify meaningful patterns and business insights.

BUSINESS OBJECTIVE

Relationship

To analyze listener engagement and repeat-song behavior across different genres, artists, and listening patterns.

Listening Habits

To analyze listening habits such as daily streaming minutes, songs liked, and listening time across age groups.

Preferences

To identify the most preferred genres and artists based on listener preferences and songs played.

Comparison

To compare streaming platforms based on popularity, subscription type, and user engagement.

Trens & Pattens

To identify key trends and patterns that can help understand user preferences and streaming behavior.

PROJECT METHODOLOGY

Explore and clean

Apply excel functions & clean dataset

Analyze

use pivot tables, statistics, outlier analysis, spread & correlation

Visualize & Tell the story

create charts, identify key insights & build visual dashboard

BUSINESS QUESTIONS

Artist

- What percentage of listeners prefers each artist ?
- How does listening time affects repeat songs rate for each artist?
- Does discover weekly engagement relate to repeat song rate?
- What is the trend in repeat song rate relative to the number of songs liked?
- Calculate mean, median , mode for number of songs played for each artist?

Streaming Platform

- Which streaming platform is most popular among listeners?
- How do free and premium users differ in their platform preferences?
- Is there any relationship between users' age and their daily streaming time?
- What proportion of users have Free vs. Premium subscriptions?
- Which streaming platform has the most consistent daily streaming behavior?

Genre

- Which genre has the highest average number of songs liked?
- Which genre has the highest average number of Repeat song rate?
- Which music genre is most preferred during each listening time?
- Which genre is most popular among listeners?

SUMMARY

Streaming Platform Insights

- Highest preference Tidal (321).
- YouTube -making it the most consistent platform as lowest variability.
- Free (51%) / Premium (49%) users
- Tidal shows almost identical behavior among Free and Premium users (53% each).

Artist Insights

- ❑ Bad Bunny (22%) and Taylor Swift (21%) and Ed Sheeran (20%) listener preferences
- ❑ Repeat listening is generally strongest in the morning.
- ❑ Repeat-song rate declines from 46% to 39%, number of songs liked increases from—100 to 500.

Genre Insights

- ❑ Reggae preference (20%).
- ❑ Country's repeat-song rate (45%)
- ❑ Classical leads in songs liked (263) than Pop (237)

RECOMMENDATIONS

MORNING PEAK: Schedule releases in the morning

TOP GENRE: Promote country and classical

NEW USERS: Focus on 1-100 liked songs

FREE USERS: Target 51% free-user base

TARGETING: Focus on genre and platform

CONCLUSION

Different tastes, different habits.

Reggae leads preference (20%) , while country drives repeat listening (45%).

One artist stands out.

Bad Bunny leads in popularity (22%), with morning listening showing stronger engagement.

Platforms shape the experience.

Tidal is preferred (321), while YouTube delivers consistent listening among users (51% Free/ 49% Premium).

The bigger picture:

Personal taste matters more than age as repeat listening spans 46% to 39% regardless of demographic.

The background of the slide features a close-up, angled view of a black vinyl record. The record's surface is covered in fine, concentric grooves. In the upper right corner, a portion of the record's center hole is visible, showing a soft pink and purple gradient. In the bottom right corner, there is a stylized starburst or sunburst graphic, also rendered in a dark pink/purple color. The overall aesthetic is modern and artistic.

Thank You!
